INCIDENT RESPONSE REPORT

1. Executive Summary:

A brute-force SSH attack was detected on the system. The attack originated from a suspicious IP address attempting multiple login attempts.

2. Timeline:

- 11:00 AM – Alert detected
- 11:05 AM – Investigation started
- 11:10 AM – Malicious IP blocked

3. Impact Analysis:

No data loss occurred. The attack was identified early and prevented before gaining access.

4. Actions Taken:

- Detected suspicious login attempts
- Identified attacker IP address
- Blocked the IP
- Monitored system logs

5. Recommendations:

- Use strong passwords
- Enable multi-factor authentication
- Implement continuous monitoring

Conclusion:

The incident was handled effectively with minimal impact.
